PROJECTS I'VE DONE AND THINGS I'VE CREATED

Full Website

<https://gmr.dev/>

My entire portfolio displayed in an easily viewed manner. Please check here.

Wall Ball iOS + Android

<https://gmr.dev/portfolio.html#wallball>

A mobile game built for both iOS and Android.

Vocabubot HTML5 + CSS3 + PHP7

<https://vocabubot.com/>

Web service that does your Membean for you, completely automated.

Diamond Dodge Unity3D + C#

<https://gmr.dev/portfolio.html#diamonddodge>

A small desktop demo to show off some VR features.

Stay in the Circle iOS + Android

<https://gmr.dev/portfolio.html#stayinthecircle>

A fully featured mobile game with lots of customization.

Searchifier C#

<https://gmr516.github.io/searchifier/>

Automatically redirects search queries from the Windows start menu from Microsoft Edge and Bing to Google and your default browser of choice, making searching web queries from the start menu a viable and quick shortcut.

WORK/WHERE I SPENT MY TIME

Upwork

Remote

Freelancer

2017 | 2019

- Worked as a Unity developer on multiple VR projects on Upwork.

Vocabubot Launch

Created Vocabubot.com

2018 | Present

- Created Vocabubot.com entirely from scratch, using HTML+CSS, JS, PHP, and MySQL databases to create a fully featured program to do people's Membean for them.

Pokemon Unity

<https://github.com/PokemonUnity/PokemonUnity>

2018 | Present

- Manage the Pokemon Unity repository for the community and continued development of the framework.

Concussion Game/Stickpage.com Partnership

2013 | 2014

- <http://www.stickpage.com/concussiongame.shtml>
- Created flash game "Concussion" and sold it to Stickpage.

EDUCATION

Saddleback College
